HENNA

BEFORE & AFTERCARE

Henna brows are a form of eyebrow tinting that is used to tint the skin and brow hairs. The henna on the skin creates an illusion of depth and fullness, visually filling in any sparseness. Henna is a natural dye made from a plant known as the mignonette tree. Henna last 6-8 weeks on the eyebrow hair and 2 or more weeks on the skin!

BEFORE HENNA SERVICE

- Please arrive without makeup on the day of your appointment.

AFTERCARE

- Do not rub the area treated
- Avoid heat treatments for 24 hours
- Do not apply brow make-up for at least 24 hours after your treatment
- Avoid sunbathing for 24 hours, as this can cause the tint to fade
- Avoid swimming/saunas for at least 24 hours after your treatment
- Avoid perfumed products for at least 24 hours after your treatment
- Please note that oil based make up remover can cause the tint to fade quicker
- Exposure to the sun/UV lights for long periods can cause the tint to fade quicker
